At Equinix, we are committed to building the best data centre workforce on earth. Our Badging programs are designed to provide progressive skill and knowledge development to learners.

Welcome to Bronze Badge Program!

Equinix's badging program offers Operations employees structured learning pathways for their development after Onboarding. A bronze badge will signify that you have demonstrated the knowledge and skills necessary to perform the basic-level job tasks for your role.

The Bronze program issues badges in two main areas of Data Centre Operations: Critical Facilities Management, and Customer Operations. Each badge consists of several subject areas that are relevant to your role.

- The Customer Operations badge includes topics ranging from IBX Security and Cross Connects to Smart Hands and Trouble Tickets. The six topics included in the badge are designed to provide baseline knowledge and skills for all employees, resulting in consistent and efficient operational outcomes.
- Topics included in the Critical Facilities badge cover electrical, mechanical, and control systems, ensuring that employees are sufficiently well-versed across all systems for efficient monitoring and operations.

To earn a badge, you must complete all of the associated topics within the curriculum. Once completed, this badge will be visible in ELC as well as the Hub.

Badging Structure

Our curriculum is built on practical and adaptive learning principles with a heavy emphasis on real-world practice, ensuring you acquire knowledge at your point of need. The design incorporates:

- **Self-paced eLearning**: Offering flexibility and control over your learning progress.
- **Knowledge Assessments**: Validating theoretical understanding.
- **On-the-Job Training (OJT's)**: Hands on application facilitated by Subject Matter Expert (SME) Instructors.
- **Comprehensive Skills Assessments**: Ensuring competency before certification. Also known as Observational Checklists (OCL's).

How This Benefits You

- **Professional Recognition –** Earning a badge offers you an opportunity to be recognised for your skills and expertise, increasing your visibility in the organisation and demonstrating your qualification for new opportunities.
- **Skills Development –** The three badge tiers – Bronze, Silver, and Gold – provide a structured plan to grow your skills, helping you progress from foundational knowledge to mastery in your chosen field.
- **Relevant and Timely Training –** Training is directly applicable to your role, delivered as needed, and tailored to meet both your development needs and the needs of the business.
- **Empowering Leadership –** Managers will gain insights through analytics to better understand and support their teams' skillsets, capabilities, and development.
